

CLASS SCHEDULING

From exercise to cooking classes, members are turning to their clubs for more than just traditional club activities. As a result, classes are becoming more a part of the club culture. In order to help you manage these functions, the Class Scheduling application allows your members to book & track resources, participate and much more to ensure that your club is effectively managed.

INSTRUCTOR & CLASS SCHEDULING

Scheduling a class and assigning an instructor can be accomplished in just a few clicks by using the Outlook ® style calendar.

CLASS DUPLICATION

Successful classes are typically requested time and time again. Duplicating classes is as simple as copying the original class and pasting it to the new date/s in your calendar. All original settings will be copied including instructor, room, and equipment.

MEMBERSHIP INTEGRATION

Direct integration with your membership information enables fast class scheduling and assignment, while providing a personalized level of service.
