

SPA MANAGEMENT

The Spa Management module enables you to integrate your wellness operations with your current software system. Whether you are just beginning to offer wellness services or you are running a full service health and spa facility, clubsystems group Spa Management will simplify your daily operations, providing a more relaxing experience for your staff and clients alike.

MANAGE YOUR BOOKINGS

Get a bird's eye view of your spa's daily bookings by provider, servicecategory, or facility. View additional details, such as client, bookingnumber, service, provider or facility.

MEMBER NOTES

Keep detailed health, booking and internal notes to allow your staff to better cater to your clients' needs. This ensures awareness of member characteristics relevant to service provision (Allergies, Preferences, etc). Notes will pop up at booking, check-in, or both, depending on user preference

SETTLE TRANSACTIONS

Once appointments have been completed, seamless integration to Point of Sale enables your staff to easily settle transactions. Open tickets on behalf of all members/guests, and all associated services will be transmitted to your Point of Sale for settlement.

Simplify your daily operations, providing a more relaxing experience for your staff and members alike
